

Express Mail Label No. EV 409530457 US  
Attorney Docket No. 6296.204-US  
Serial No. 09/853,193

**Amendments To The Specification**

Please replace the paragraph at page 10, lines 15-18 of the specification with the following paragraph:

In order to save life, it is important that the blood glucose level of a critically ill patient is kept within the range from about 80 to about 110 mg/dL. This can be done by using insulin preparations from Novo Nordisk A/S. [More information will be available from [www.novonordisk.com](http://www.novonordisk.com).]
